Engineering Memo

Commander Warehouse Equipment Ltd.
Attention: Wilson Lee
Re: SCE 3000 “Unitran” Storage Bin

As per your request, the undersigned reviewed the submitted shopdrawings # U-1116 & # U-1117 and design checked the “Unitran” manufactured SCE 3000 stackable structural steel storage bin with maximum total weight of 3000 lbs. Structural steel yield strength min. 50 Ksi.

The SCE 3000 storage bin, as detailed on shodrawings # U-1116 and # U-1117 is structurally adequate to support 4 levels of identical bins, stacked on top of each other, each having maximum 3000 lbs total weight.

The base structure below the bottom bin is not part of this certification.

Should you have any questions or comments, please call the undersigned.

Yours truly,
Julian Gyula Bozsik, P.Eng., M.Eng., Principal
for *Burnaby Engineering Associates Ltd.*
